EXPERIENCE

Vetro GlobalEdge LLP Remote
Full Stack Developer Intern February 2026 – May 2026
- Developing a commercial-level administrative dashboard for a logistics management platform.
- Engineering full-stack solutions for real-time inventory oversight between warehouse owners and merchants.
- **Tech:** React, Node.js, Express, MongoDB, MERN Stack

Wikimedia Foundation Remote
Open Source Contributor [Phabricator] [Gerrit] September 2025 – Present
- Contributing code patches to Wikimedia's open-source ecosystem, including MediaWiki core and extensions.
- Managing development tasks and lifecycle tracking via Phabricator and Gerrit.

PROJECTS

Brain Tumor Detection & Localization (Major Project)(SIP)
- Architected a full-stack platform using Next.js for the UI, bridging directly to a Python/FastAPI backend for high-throughput MRI processing.
- Implemented EfficientNet-B3 transfer learning for multi-class classification alongside a deep segmentation model and Grad-CAM heatmaps for explainable localization.
- **Tech:** Next.js, MongoDB, Python, FastAPI, EfficientNet-B3, TensorFlow, OpenCV, Grad-CAM [Github]

Link2Logistics: Supply Chain Dashboard
- Engineered an administrative dashboard for a logistics platform using Next.js, reducing data retrieval latency by 20% through optimized caching.
- Streamlined merchant-supplier coordination and inventory logging infrastructure.
- **Tech:** Next.js, Tailwind CSS, Firebase, Cloudinary [Website]

UIT-MAP: Virtual Project Tracker (Institutional Project)
- Managing Backend for a web application approved for institutional use to virtualize the final-year project diary process.
- Developed a Rubric Management module reducing manual evaluation processing time by 40% for institutional administrators.
- **Tech:** PHP, SQL, HTML, CSS, JavaScript, Git [Website]

SKILLS SUMMARY

- **Languages:** JavaScript, TypeScript, Java, Python, SQL, HTML, CSS
- **Frameworks & Web Tech:** React.js, Next.js, Node.js, Express, REST APIs, Tailwind CSS, Bootstrap, FastAPI
- **Databases & Cloud:** SQL Server, PostgreSQL, MySQL, MongoDB, Firebase
- **Tools, DevOps & Version Control:** Git, Gerrit, Phabricator, n8n
- **Core CS Fundamentals:** Object-Oriented Programming (OOP), Software Development Lifecycle (SDLC), DBMS, Computer Networks

EDUCATION

United Institute Of Technology Prayagraj, India
Bachelor of Technology – Computer Science & Engineering; Cumulative: 72.4% (Till 5th Sem) 2023 – 2027

ACHIEVEMENTS

- **International Selection:** Selected as a Volunteer for the prestigious Wiki Conference India 2026 held in Kochi.
- **Top 7 Finish:** 6th Technovation Hackathon at Sharda University.
- **Top 10 Finalist:** State Level Hackathon organized at United University.

LEADERSHIP ROLES & VOLUNTEER EXPERIENCE

Technical Lead August 2025 – Present
WikiClub Tech-UIT Prayagraj, India
Founded and lead the technical community, providing open-source mentoring and setup training for over 50 students entering the Wikimedia ecosystem. Developed the official club community platform with a dynamic contribution leaderboard.

Core Team Member June 2026 – Present
Google Developer Group (GDG) & TFUG Prayagraj Prayagraj, India
Assisting in organizing local technical workshops, boot camps, and hands-on developer community engagement initiatives.
